***Detailed Action***

This is the second Office Action corresponding to amendment filed Nov 26, 2004. The application contains 32 claims. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

***Information Disclosure Statement***

Tupperware reference cited on IDS filed Jul 12, 2004 is acknowledged, other references cited were already acknowledged before. IDS filed Aug 26, 2004 has been considered. IDS filed Sep 20, 2004 has been considered. IDS filed Nov 26, 2004 have been considered but for the two foreign references which could not be opened. The problem has been reported. Rather than wait for the correction of this problem, the examiner decided to continue with the prosecution of the application. These references would be considered on a later date.

***Claim Rejections - 35 USC § 102***

Claims 1, 4, 5, 6, 8, 31 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Jasmagy, Jr. (Pat No 4,844,400).

The patent to Jasmagy, Jr. discloses a suspension device comprising a hanging member (24), a backing member (18) and a suspension member (16) for receiving a container in a vertical position. The suspension member is defined by a wall

Art Unit: 3632

member (12) wherein one side of the wall resists movement of the container from one direction, and the other side of the wall resists movement of the container from a second position. As to the method claims, the suspension device shown by Jasmagy, Jr. can be used following the recited method steps.

***Claim Rejections - 35 USC § 103***

Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jasmagy, Jr.

To make the different elements of Jasmagy, Jr. integral is considered to be an obvious matter of engineering choice since it has been held to be within the general skill of a worker in the art to make plural parts unitary and viceversa as a matter of obvious engineering choice. As to the specific shape of the suspension member, the same is also considered to be a matter of engineering choice to receive containers of different shapes; for example, a square shape for a square container, etc.

Claims 13, 14, 17-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jasmagy, Jr. in view of Goldman (Pat No 5,833,056).

The patent to Jasmagy, Jr. supports containers but does not describe them.

The patent to Goldman shows a container (60) comprising a lid (62) with a tab.

It would have been obvious to one skilled in the art at the time the invention was made to have used a container as the one shown by Goldman with Jasmagy device as one of many containers capable of being used. As recited above, it has been held to be within the

Art Unit: 3632

general skill of a worker in the art to make plural parts unitary and viceversa as a matter of obvious engineering choice.

*Allowable Subject Matter*

Claims 15, 16, 29 and 30 are allowed.

Claims 32-34 and 36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Response to Arguments*

Applicant's arguments have been fully considered but they are not persuasive. The prior art is being capable of being used as recited by the rejected claims. A container is capable of being inserted on a non-horizontal position, and the interference fit depends from the size of the container.

*Conclusion*

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 3632

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
